

## PROJECT TITLE: Smart Deal App

### OBJECTIVE:

- 1) We aim to make an app which gives a platform to different shops to sell their items in IIT Bombay (can go to higher levels) online.
- 2) Shop in charge can have their own respective accounts through which they will come to know about the customers' requests.
- 3) Individuals (say graduate students) can also make their account and keep the second hand items like books, workshop tools on sale.

### IMPLEMENTATION STEPS:

- 1) Understanding html, styling and css in 1<sup>st</sup> week doing tutorials.
- 2) We will start designing the looks of the website.
- 3) Our work is divided into two parts.
  - **For traders:**
    - We will design looks of the home page of the website.
    - A list of traders and items to be on sale needs to be displayed.
    - Options log in or make a new account to be added.
    - A log in portal to be made for traders.
    - An option to add and remove products to be made for the trader
    - An option to see any requests by a costumer to be made for the trader.
  - **For costumer:**
    - Option to search items.
    - An option to select products from the main site.
    - Then the list of traders with that product should appear.
    - The costumer will then send request and fill a form regarding the details.
    - Individuals should have the option to put requests of items which are not available.
- 4) Also iitb students can also keep 2<sup>nd</sup> hand products (say book) on sale which can be of use for others. For that-
  - While making an account, the account can be made as a trader(as given above) or just an individual and give the respective contact details.
  - On the home page, those things on sale will be kept on notice board.

We aim to learn programming language and making websites.

## **Team Members**

There is a change in our team. The team member “Drishti Gehlot” is replaced by “Piyush Lariya”. Following are his details:

PIYUSH LARIYA

Roll no. - 13d110015

LDAP ID- piyush28.iitb.ac.in

Alternate email id- [lariyapiyush@gmail.com](mailto:lariyapiyush@gmail.com)

Mobile no. - 996732807
