

Project Title : Androsync (2j1j as a codename)

Implementation Steps :

- Week 1:
Learning and analyzing the features of Android OS.
Downloading and studying the source code.
- Week 2:
Studying and implementing Dropbox API's in the code.
- Week 3 & 4:
Implementing everything.
- Week 5:
Refining and fixing bugs.

Components required and their price estimate:

Not much as we are doing everything (specifically coding) in our own laptops.

Things Expected to learn at the end:

- More hard core Android coding.
- Learn how to use API's.
