

# project move

---

week 1.

this week will be dedicated to making a final plan of what to do .

we will decide the final design and materials. we will also start the cad design of the chasis and learning android development.

week 2.

we will have completed the chasis after probable laser cutting etc.

we will have written atleast a simple android app.(might no relate to the project).

week3 .

finish the project elec part. and start debugging mechanical part.

we expect to learn cad design and android development.

estimated cost 13000.

for further info see project description.
